be hazardous		

Components not listed are not physical or health hazards as defined in 29 CFR 1910.1200 Hazard Communication Standard.

4. FIRST-AID MEASURES

Eye Contact	: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully without rubbing eyes. Consult a physician if irritation persists.
Skin Contact	: Remove contaminated clothing. Wash affected
	areas thoroughly with soap and water. Consult a
	physician in case of a lasting irritation.
Inhalation	: Get medical advice immediately. Remove to fresh
	air, away from the accident scene and keep at rest
	in a position comfortable for breathing. If the subject
	stops breathing, administer artificial respiration.
Ingestion	: Have the subject drink as much water as possible.
	Get medical advice immediately and show this SDS.
	Do not induce vomiting without medical advice.

5. FIRE-FIGHTING MEASURES

Flammability of the Product	: Classed as flammable.
Products of Combustion	: Decomposition products may include the following materials:
	Carbon dioxide Carbon monoxide Nitrogen oxide/oxides
Suitable Extinguishing Media	: Use foam, dry agent (carbon dioxide, dry chemical powder) for extinction.
Not Suitable Extinguishing Media	Do not use water jet. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.
Fire-Fighting	: Highly flammable liquid. Keep containers cool with water spray. Keep storage tanks, pipelines, fire exposed surfaces etc. cool with water spray. Shut off any leak if safe to do so and remove sources of reignition. Vapour/air mixtures may ignite explosively and flashback along the vapour trail may occur. On burning will emit toxic fumes. Fire fighters to wear self-contained breathing apparatus if risk of exposure to vapour or products of combustion.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, : Protective Equipment and Emergency Procedures	Block the leakage if there is no hazard. Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any
	contamination of skin, eyes and personal clothing.
	Send away individuals who are not suitably equipped. Eliminate all sources of ignition
	(cigarettes, flames, sparks, etc.) from the leakage
	site.
Environmental :	The product must not penetrate into the sewer
Precautions	system or come into contact with surface water or
	ground water.
Methods and Materials for : Containment and Cleaning Up	Collect the leaked product into a suitable container. If the product is flammable, use explosion-proof equipment. Evaluate the compatibility of the

SDS.78 - Edition #: 1 Page 4 of 10

container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

7. HANDLING AND STORAGE

	·····
Precautions for Safe : Handling	Ensure that there is an adequate earthling system for the equipment and personnel. Avoid contact with eyes and skin. Do not breathe powders, vapours or mists. Do not eat, drink or smoke during use. Wash hands after use. Avoid leakage of the product into the environment.
	Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without
	adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised.
Conditions for Safe :	Store only in the original container. Store in a
Storage	ventilated and dry place, far away from sources of ignition. Keep containers well sealed. Keep the product in clearly labelled containers. Avoid overheating. Avoid violent blows. Keep containers away from any incompatible materials, see section 10 for details. Store in a well-ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition.

Exposure Controls

Respiratory Protection	:	Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate threshold value. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted approved respirator for organic solvent vapours. A		
		dust mask does not provide protection against vapours.		
Eyes Protection	• •	Use safety glasses to avoid exposure to liquid splashes.		
Hand Protection		Wear gloves to minimize skin contact.		
Hygiene Measures		Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.
