1. IDENTIFICATION

Product Name	:	Perla, Decorative Paint (BMA-DPE)
Colors	:	Catalog Colors
Material Uses	:	Suitable for interior decorative coatings.
Description	:	Silky decorative coatings. Acrylic emulsion based, containing metallic pigments with gold psoriasis
		finish.
Manufacturer	:	BMA Commercial and Industrial s.a.r.l Industrial Valley, Ain Saade Nahr El Mot 55091, North Metn Lebanon
Telephone Number	:	+961. 1. 885385 / 485
Emergency Phone Number	:	+961. 1. 885385 / 485
Fax Number	:	+961. 1. 885685
E-mail	:	info@bmapaints.com
Website	:	www.bmapaints.com

2. HAZARDS IDENTIFICATION

Physical State	: Liquid, viscous	
Odor	: Characteristic	
Eyes	: Particles in the eyes may cause irritation and smarti Repeated or prolonged eye contact may cau	use
	inflammation characterized by temporary redn (similar to windburn) of the conjunct (conjunctivitis); temporary impairment of vis and/or other transient eye damage/ulceration moccur.	tiva sion
Skin	: Acts as a defatting agent on skin. May cause cracking of skin and eczema.	
Ingestion	: May cause stomach pain or vomiting.	
Inhalation	: Vapours may cause drowsiness and dizziness.	
	High concentrations of vapours may irritor respiratory system and lead to headache, fatignatuse and vomiting.	

SDS.43 - Edition #: 1

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS Number	% by weight
2-Amino-2-	124-68-5	0.30 - 0.50
Methylpropanol		
Ethylene Glycol	107-21-1	2.50 - 3.00
1,2-benzisothiazol-	2634-33-5	≤0.01
3(2H)-one		
2-methylisothiazol-	2682-20-4	≤0.01
3(2H)-one		

Components not listed are not physical or health hazards as defined in 29 CFR 1910.1200 Hazard Communication Standard

4. FIRST-AID MEASURES

Eye Contact	· ·	Flush eyes with large amount of water for at least 15 minutes without rubbing eyes. Consult a physician if irritation persists.
Skin Contact		Remove affected person from source of contamination. Immediately remove all contaminated clothing, including footwear. Wash affected areas thoroughly with soap and water. Consult a physician in case of a lasting irritation.
Inhalation		If inhaled: Remove to fresh air and keep at rest in a position comfortable for breathing. In case of unconsciousness place patient stably in side position for transportation.
Ingestion		If swallowed, seek medical advice immediately and show this SDS. Do not induce vomiting without medical advice. If vomiting occurs, lean patient forward or place on left side (head-down position) to maintain open airway and prevent aspiration. Never give liquid to a person showing signs of being sleepy or with reduced awareness.

5. FIRE-FIGHTING MEASURES

General Information and	:	The product is not combustible.
Flammable Properties		
Special Hazards arising	:	Do not breathe combustion products (carbon
from the product		oxide, toxic pyrolysis products, etc).
Suitable	:	Dry powder, CO ₂ or foam or water spray.

SDS.43 - Edition #: 1 Page 2 of 8

Paints BMA Commercial & Industrial s.a.r.l. SAFETY DATA SHEET - Perla Decorative Paint

Not Suitable :	Do not use water jet.
Special Protective :	Avoid breathing fire vapours.
Equipment and	Cool containers exposed to flames with water.
precautions for fire-	Wear breathing apparatus, protective gloves and
fighters	eye protection.
	Use fire-fighting procedures suitable for surrounding
	area.
	Employ protective equipment commonly used in
	the event of fire.
	Avoid inhalation of fumes from residue.
	DO NOT approach containers suspected to be hot.

6. ACCIDENTAL RELEASE MEASURES

O. ACCIDENTAL KELLA	ISL MILASURLS
Protective Equipment :	Ensure adequate ventilation, do not breathe dust and vapours.
	(see Section 8)
Methods and materials for : containment and cleaning up	Minor Spills: Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. Wear protective clothing, gloves, safety glasses and respirator. Place spilled material in clean, dry, sealable, labeled container.
	Major Spills:
	Major Spills: CAUTION: Advise personnel in area. Alert Emergency Services and tell them location and nature of hazard. Control personal contact by wearing protective clothing. Prevent, by any means available, spillage from entering drains or water courses. Recover product wherever possible.
	For cleaning up: Ventilate, Clean-up personnel should use respiratory and / or liquid contact protection. Absorb in vermiculite, dry sand or earth and place into containers. Do not contaminate water sources or sewer.

7. HANDLING AND STORAGE

7. HANDLING AND STORAGE		
Precautions for So Handling	ife :	Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. Avoid spilling, skin and eye contact. Avoid breathing vapours. Use approved respirator if air contamination is above accepted level. DO NOT allow material to contact humans, exposed food or food utensils. Avoid all personal contact, including
		inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. Do not eat, drink or smoke while handling. Always wash hands with soap and water after handling. Launder contaminated clothing before re-use. Use good occupational work practice. Observe manufacturer's storing and handling recommendations. Workers should wash hands and face before eating, drinking and smoking.
Conditions for Saf Storage	e :	Consider storage in bounded areas – ensure storage areas are isolated from sources of community water (including storm water, ground water, lakes and streams). Ensure that accidental discharge to air or water is the subject of a contingency disaster management plan; this may require consultation with local authorities. Keep containers securely sealed when not in use. Avoid physical damage to
		containers. Store in securely sealed original containers. Store in a cool, dry area protected from environmental extremes. Store away from incompatible materials and foodstuff containers. Protect containers against physical damage and check regularly for leaks. Observe manufacturer's storing and handling recommendations. Take all

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components with Workplace Control Parameters

<u>Product name</u>		Exposure Limit
Ethylene Glycol	:	WEL - Long Term TWA (8 Hr.): 52 mg/m³ – 20 ppm WEL - Short Term STEL (15 min): 104 mg/m³ – 40 ppm

precautions mentioned in this document.

Store between +5 °C and + 35 °C.

SDS.43 - Edition #: 1

Paints BMA Commercial & Industrial s.a.r.i. SAFETY DATA SHEET - Perla Decorative Paint

Exposure Controls

Appropriate Engineering Controls	:	Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection. The basic types of engineering controls are:
		Process controls which involve changing the way a job activity or process is done to reduce the risk. Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment. Ventilation can remove or dilute an air contaminant if designed properly.
		The design of a ventilation system must match the
		particular process and chemical or contaminant in
	/	use. Employers may need to use multiple types of controls to prevent employee overexposure. Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates.
Respiratory Protection	:	In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer
		exposure use self-contained respiratory protective
		device.
Eye Protection	:	Safety goggles recommended during refilling
Hand Protection	:	Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent). When prolonged or frequently repeated contact may occur, a glove with a protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN 374, AS/NZS 2161.10.1 or national
		equivalent) is recommended.
		When only brief contact is expected, a glove with a protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. Contaminated gloves should be replaced. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried

Paints BMA Commercial & Industrial s.a.r.i. SAFETY DATA SHEET - Perla Decorative Paint

		thoroughly. Application of a non-perfumed
		moisturizer is recommended.
Body Protection	:	Wear appropriate clothing to prevent any possibility
		of liquid contact and repeated or prolonged vapour
		contact.
Hygiene Measures	:	Wash hands, forearms and face thoroughly after
		handling chemical products, before eating, smoking
		and using the lavatory and at the end of the working
		period. Ensure that eyewash stations and safety
		showers are close to the workstation location.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State	:	Liquid, viscous
Color	:	Catalog Colors
Odor	:	Characteristic
_pH	:	8 - 9
Relative Density (g.cm ⁻³)	:	(1.04 ± 0.02)
Flammability	:	Not applicable
Flash Point °C	:	Not applicable
Flammability Limit – Lower	•	Not applicable
(%)		
Flammability Limit – Upper	:	Not applicable
(%)		
Lower Explosion Limit, vol	:	Not applicable
/ vol air		
Upper Explosion Limit, vol	:	Not applicable
/ vol air		7 /
Boiling Point (°C)	:	No data available
Melting Point (°C)	:	Not applicable
Solubility in water at 20 °C		Miscible with water
Solid Content % wt		38 ± 2
Partition coefficient n-	:	Not applicable
Octanol/Water		

SAFETY DATA SHEET - Perla Decorative Paint

10. STABILITY AND REACTIVITY

Stability and Reactivity : Chemical stability: The product is normally stable.

Possibility of hazardous reactions: No dangerous

reactions known.

Conditions to avoid: No significant condition. <u>Incompatible materials:</u> No significant material.

Hazardous Fire creates: Toxic gases / vapours / fumes of: **Decomposition Products**

Carbon dioxide (CO2) and Carbon monoxide (CO).

Hazardous Polymerization: It will not occur.

11. TOXICOLOGICAL INFORMATION

Specific information about the product itself are not available.

Component: Ethylene Glycol

Acute Oral Toxicity : LD50 (Rat) = 4,700 mg/Kg

: LD50 (Rabbit) = 10,600 mg/Kg Acute Dermal Toxicity

12. TRANSPORT INFORMATION
